

# Pictures of Prospect

Since the invention of photography in the 1840s the residents of Prospect have used it as a medium to document their lives. Almost all community events and almost every person has had a picture taken. We hope to be able to show as many of the existing historical photos as possible. If you would like to donate your family's photos to the website it would be greatly appreciated. We have the ability to scan photos and to make copies. Helping us add to this collection helps those from far away place a face to a name, adding so much more to the search for our ancestors.
