

W.R. MacAskill Photographs of Prospect

The following photographs of Prospect were taken by the famous Nova Scotian photographer Wallace R. MacAskill during the period of 1920 to 1938. The photos were obtained from PANS (Public Archives of Nova Scotia) by Ed Rogers and were scanned by Douglas Grant. Doug has gone one step further and has taken pictures from the exact same spot where MacAskill took these pictures 70 years ago, so you are going to see the Prospect of yesterday and the Prospect of today.
